

MAFAC ELBA

Technical specifications

Benefits for the user:

- Patented rotating multi-side spray system with counter-rotating basket pickup system (can be switched off). With specifically arranged nozzles for reliable cleaning results.
- Two large-capacity tanks for long life of the process water.
- Cascade design of tanks for extended life of media.
- Reduced energy consumption thanks to insulated tanks.
- Separate heating of tanks.
- Removable swarf filter trays for collecting coarse dirt particles in the return flow from the cleaning/rinsing process.
- Coalescing oil separation system with integrated surface suction device in tank 1 and high-level monitoring of the oil collection tank.
- Steam extraction with mist collector, return of condensation and condensate.
- Hinged door with drip tray as a versatile load/unload platform. After the end of the cleaning process, automatic opening of the hinged door is possible.
- Easy-to-use MAFAC MAVIATIC touch panel.
- Ultra-fine filtration on pressure side of the pump for removing small dirt particles before cleaning/rinsing.
- The hot air pulse blowing system keeps residual water to a minimum for a higher degree of dryness in the parts.
- Hot air drying system for optimum heating and

Standard features:

- Front loading with hinged door and sliding plate
- Counter-rotating spray system and parts loading system
- Spray cleaning and rinsing in one machine
- EURO standard baskets can be used (600 x 400 x 288 mm)
- Underwater swarf filter tray
- Bath heating system with analogue temperature control and cut-off
- Thermal insulation of tanks
- Steam extraction with condensation and mist separator
- Coalescing oil separator with high-level monitoring of the oil collection tank
- Media fill level control
- Water contact components made of stainless steel / plastic
- Easy-to-use MAFAC MAVIATIC touch panel

Options :

- Rotating pulse blowing system
- Stationary hot air drying system
- working chamber size adjustable to max. 660l x 480W x 338H (mm)
- Larger versions available on request
- Ultra-fine filtration on pressure side of pump
- Speed control for basket rotation including oscillation
- Program package for machine pre-heating and media treatment
- DI unit
- Draining pump
- Bund tray acc. to German Water Resources Act
- Automatic vertical sliding door as an alternative to the hinged door
- Charging trolley
- Modem for remote maintenance of the control system
- Automatic transfer system
- Speed control with nozzle rotation
- Frequency-controlled pump pressure
- Rinse water treatment module
- Heat exchange module
- Larger versions available on request
